

Request for Proposals
Haiti Livestock Baseline Assessment and Gender and Youth Inclusion Analysis
Land O'Lakes Venture37

Land O'Lakes Venture37 invites proposals to conduct a baseline and gender and youth inclusion (GYI) analysis for the 5 year, \$23 Million Haiti Programme d'Appui a la Rentabilisation de l'Elevage (PARE), funded by the United States Agency for International Development (USAID). PARE is implemented by Land O'Lakes Venture37 in partnership with Heifer International and Papyrus S.A from January 9, 2023 – January 8, 2028. The Activity aims to increase the resilience of households and communities in 4 Departments and 35 communes in Northern and Southern Resilience Focus Zones of Haiti through the improvement of the livestock market system.

The baseline will assess the current status of livestock producers and communities in the goat, sheep, poultry and cattle value chains, set baseline values for outcome indicators and provide recommendations for the PARE project based on the findings. The gender and youth inclusion analysis will assess the current status, constraints and opportunities for women and youth inclusion through the target livestock value chains.

The assignment will last from February through June 2023. Applicants are expected to have strong experience in conducting baseline and gender and youth analyses of similar scope with expertise in livestock and gender. Experience conducting fieldwork in Haiti is essential.

To receive a full copy of the request for proposals, including application instructions, interested parties should email Ashley Hartz at ahartz@landolakes.com. Final proposal must be received by or before Tuesday, January 31, 2023.

NOTE: Land O'Lakes Venture37 reserves the right to accept or reject/cancel or reissue this RFP without assigning any reason. Only shortlisted proposals will be contacted.
